MISSION

to create a quantum-based digital reality within the Metaverse that allows humans to continue to thrive and maintain a sustainable, economically and socially viable society, even in a future where traditional employment may no longer be necessary.

PROBLEMS

- Unemployment
- Unsustainable Economic Model
- Global Warming
- Consumption habits

SOLUTION

As automation and artificial intelligence continue to advance, many traditional jobs will become obsolete. Even for qualified people.

Metazo's co-creation model and use of tokenization offer a new alternative to Universal Income for people to generate income. It also virtualizes production and consumption.

BUSINESS MODEL

Metazo offers a platform that allows users to easily access and utilize various services, such as streaming, cloud computing, storage, and video conferencing, without requiring technical expertise. The platform provides the necessary infrastructure to develop these services.

Metazo can generate income through various means, including the sale of virtual products developed by Metazo, the opportunity to create their own universes through the "Metaverse-as-a-service" offering, and platform commissions.

ACHIEVEMENTS

- Raising \$376,000 in a seed investment round open only to friends and family, with a valuation of \$10M
- Receiving positive feedback from the Netherlands Enterprise Agency (RVO) regarding the innovative nature of the project
- Conducting tests with over 10,000 visitors, including guests, during the closed alpha phase
- Developing their own cloud computing infrastructure

PARTNER REQUEST

We are always looking for partners who are passionate about creating immersive experiences within the Metaverse. If you have a vision for the future of digital reality and want to join forces with us to make it a reality, we welcome the opportunity to collaborate and utilize our technology to bring your ideas to life. Whether you are a content creator, event organizer, or have access to valuable talent or resources, we believe that together we can push the boundaries of what is possible within the Metaverse.

TEAM

Metazo has a team of 7 people based in the Netherlands, including the founder. In addition to this, there are 7 team members located in Germany, Romania, and Turkey.
