VILLAGE

Bastiaan van de Rakt Entrepreneur & Investor in early-stage AI/ML

As an entrepreneur 20+ year experience in building tech solutions using consumer and business data with a special focus on Machine Learning and AI in online marketing, tech, finance, retail, energy, and healthcare.

Advisor/supervisor of multiple organizations and build multiple tech & engineer teams as own start-ups and within consultancy firms or as CTO of fast-growing scale-ups.

Last year's focus on topics in Machine Learning within Applied Earth Sciences field and integration of Machine Learning and Quantum Computing.

“For the last 20 year I love new entrepreneurial opportunism and struggles of newly born and very early-stage AI and Quantum Computing start-ups, and that's why I'm honored to work as an advisor at Startup Village”

Bastiaan holds a master's degree in system engineering, policy, and management from Delft University of Technology.
